With sequencing of the human genome and technological advances in molecular biology, many studies focus on radiation effects on gene expression using high throughput profiling approaches. The availability of array technology makes screening of individual cells for gene expression changes after irradiation possible, allowing these to be related to cellular responses even at low dose [6].

Advances in Radiation Oncology is a peer reviewed, wide-ranging open access journal from the American Society for Radiation Oncology (ASTRO). Included in PubMed Central, Advances complements the research in the International Journal of Radiation Oncology • Biology • Physics and Practical Radiation Oncology.

Advances in Radiation Oncology - Journal - Elsevier

Advances in radiation oncology have been made on three major fronts: biology, physics, and clinical application. Our biological understanding of how radiation kills cells and how malignant cells avoid damage has identified new targets for therapeutic manipulation.
