

Aids In Nigeria A Nation On The Threshold Harvard Series

Aids In Nigeria A Nation

Nigeria has the second largest HIV epidemic in the world.¹ Although HIV prevalence among adults is much less (2.8%) than other sub-Saharan African countries such as South Africa (18.8%) and Zambia (11.5%), the size of Nigeria's population means 3.1 million people were living with HIV in 2017.² However, a recently published Nigeria HIV/AIDS Indicator and Impact Survey (NAIIS), one of the largest population-based HIV/AIDS household surveys ever conducted, found the prevalence to be just 1.4%.

HIV and AIDS in Nigeria | AVERT

Share This. Soon Nigeria will be home to more people living with HIV than any other country in Africa. With 5 percent of its inhabitants already infected, Nigeria has reached the critical threshold that can catapult rates to nearly 40 percent of a country's population. The full magnitude of Nigeria's epidemic will be determined by its response now.
